The Honorable Maria Cantwell United States Senate Washington, DC 20510

Dear Senator Cantwell:

The Northwest Power and Conservation Council strongly supports funding for Columbia River Basin hatcheries be included in the FY 2022 budget reconciliation legislation.

These critically important facilities, which mitigate for hydropower and habitat impacts on naturally produced salmon, steelhead, and freshwater fish, have been underfunded for years. Their neglect especially threatens the region's ability to support the recovery and conservation of fish populations listed under the Endangered Species Act. The hatcheries also are vital for the exercise of treaty reserved rights of the four lower Columbia River treaty tribes, as well as non-Indian and commercial fisheries along the entire West Coast. Columbia Basin hatchery programs also play a critical role economically by contributing to U.S. Fisheries in Alaska, Washington, Oregon, and Idaho that provide more than 26,700 full time equivalent jobs and \$3.4 billion in economic value annually. Today, as a result of the lack of funding, the total needs for hatchery maintenance and upgrades across multiple agencies in the Columbia Basin are estimated to be \$1 billion.

The Council was pleased to see that the House Natural Resources Committee included \$250 million for NOAA hatcheries, as authorized under the Mitchell Act, in its section of the House reconciliation bill. While we commend and support the House committee for taking this important first step, and urge your support for this provision, funding only Mitchell Act largely ignores the upper basin and does not address federal mitigation requirements due to construction and operation of hydropower dams. We ask that the Senate also include funding for other Columbia Basin hatcheries that are funded by appropriations for the U.S Fish and Wildlife Service, U.S. Army Corps of Engineers, and the Bureau of Reclamation. A coordinated regional approach to adequately fund all

503-222-5161 800-452-5161 Fax: 503-820-2370 hatchery operations and maintain and modernize hatchery infrastructure to meet their intended goals is critical to meeting federal mitigation obligations in the entire Columbia River Basin.

The Council greatly appreciates your attention to this important Columbia Basin issue. Please do not hesitate to contact us should you have questions or require additional information.

Sincerely,

Richard Devlin

Chair
